	2130		3.751	LSB	

NOTES

- Members in the USA, Central Europe and worldwide are requested to work out their own time Zone differences and DST differences and enter the times which equate to UTC/GMT in the blank columns for their own use.
- 60m Band – members should adhere to their countries band plan.
- It is important when following the International Sked not to QSY to the next frequency until the allotted time even if you cannot hear any members calling otherwise there might as well not be a controlled QSY system. We do not know who can hear us therefore our listeners around the world will follow the sked no matter what because that is all they can do.
- Member(s) can arrange a sked with other member(s) at any time before or after the controlled sked times or, have a QSO with any amateur radio station they can hear.
- WACRAL ZELLO channel – will may be used as a call back facility during the international radio skeds and weekly nets. In addition, POTA will be transmitted on the WACRAL Zello channel on a Sunday morning at 0800 local time UK. If you do not have Zello, please try to download it – it is free and quite easy to use.
- SEARCH BOLDLY UP AND DOWN THE BANDS FROM THE SKED FREQUENCY and listen for WACRAL stations or on the weekly nets, listen for the control station M1CRA.**
